Profiles	 Arjun LinkedIn  Arjun288 GitHub	
Summary	Frontend Engineer with deep expertise in JavaScript, HTML5, CSS3, and modern component-based frameworks like React.js. Adept at cross-browser compatibility, mobile-first responsive design, and optimizing web performance for maximum speed and scalability. Skilled in collaborating on agile workflows, integrating RESTful APIs, and implementing clean UI patterns that directly elevate user engagement.	
Skills	Programming Languages C, Python, JavaScript, SQL Frontend: HTML5, CSS3, BootStrap, TailwindCSS, Responsive Design Backend: Node.js, Express.js (Basic), REST APIs, DOM Manipulation Databases & Version Control: MongoDB, MySQL, Git, GitHub	
Education	Shri Siddhi Vinayak College of Engineering Bareilly Computer Science and Engineering	2023 - Present Bachelor of Technology (B.Tech)
Projects	Student Dashboard 🔗 Project Link Architected and Deployed a high-performance, mobile-first student dashboard using React.js and Tailwind CSS, achieving 100% responsiveness and cross-browser compatibility across all device sizes. Engineered interactive UI components and dynamic state management using Modern JavaScript (ES6+), reducing user interaction latency and significantly improving the overall user experience (UX). Optimized frontend performance and asset loading, resulting in faster page load times and adhering strictly to semantic HTML5 and clean UI/UX usability standards. Developed modular, reusable component structures ensuring high code maintainability, clean architecture, and seamless scalability for future feature integrations. HTML5, CSS3, JavaScript Personal Portfolio Website 🔗 Project Link Designed and Developed a pixel-perfect personal portfolio website using HTML5, CSS3, and JavaScript (ES6+), incorporating fluid layouts to elegantly showcase engineering skills and interactive project live links. Formulated a mobile-first UI architecture with advanced media queries, guaranteeing flawless rendering and consistency across a diverse matrix of screen viewports. Boosted asset efficiency and minimized code overhead by auditing bundle sizes, resulting in lightning-fast initial rendering speeds and fluid user transitions. Prioritized user-centric usability by integration of clean design typography, intuitive navigation structures, and high-contrast accessibility standards to maximize visitor retention. HTML5, CSS3, JavaScript	
Achievements & Strength	- Strong analytical and problem-solving skills. - Self-motivated and eager to learn emerging technologies. - Responsible, disciplined, and committed to continuous improvement. - Ability to work effectively in both individual and team environments.
